▶ TECHNOLOGY OVERVIEW

The present invention disclosed a mobile application-based charity system which is able to provide a platform for public to donate or contribute and for people in need to ask for donation. The mobile application-based charity system comprises a user interface unit; an event organizer unit; a donation unit; a wishes unit; a services unit; a system interface unit; a share unit; a link unit; and a database unit. The mobile application based charity system can be used in smart phones, tablet or such other related electronic devices.
