▶ TECHNOLOGY OVERVIEW

The present invention disclosed a pM^T-GFP^{Ubx} plasmid which is able to induce expressions of Ultrabithorax-Green Fluorescent Protein (Ubx-GFP) tagged fusion protein. The pM^T-GFP^{Ubx} is a 5.3kb expression vector designed for use with the *Drosophila* insect cell lines. Upon transfection, the vector allows transient, inducible expression of Ubx-GFP tagged proteins in *Drosophila* cells.
